Dear Mr. Loewen,

Thank you so much for the wonderful job you did on my kitchen. You truly made my visions for my kitchen come true.

It was a pleasure working with such a professional craftsman. You listened to my verbal descriptions of what I wanted and turned all of them into reality, even taking them to a level that I did not imagine. The crown moldings are superb. The light diffuser you constructed at the bottom of the overhead cabinets above the stove directs this task lighting where it needs to be yet prevents an unsightly glare when viewing the kitchen from the dining room. The small corner shelf provides a handy place for my most-used spices while also adding interest and character to what would otherwise be a boring undercabinet corner. The hardware you installed helps update the look of the kitchen and the threshold you installed has helped keep out the winter drafts.

You arrived at my home each day on-time, ready to work and with all your tools in top working condition. You worked diligently and accurately on each day's task without stopping to take phone calls or text message as so many other service people are prone to do these days. I truly felt as though my job was your #1 priority.

Whenever guests visit my home, I tell them of my experience working with you and recommend that they contact Karl's Carpentry LLC if they are in need of any carpentry services. I highly recommend your excellent services to anyone who is looking for quality carpentry craftsmanship.

Please know that I will be contacting you in the future when I have additional carpentry work to be done.

Until then, thanks again for the wonderful experience of working with you.

Best Regards,
Sharon B. Savage
